Cut out pattern pieces and join along side.

Pattern does not include seam allowance. Simply trace around whale onto your fabric and then roughly cut out the shape, outside the line. Sew on the line when putting it together.

If adding the water spout, place it on top of the head, sandwiched in between your 2 layers of fabric, pointing in towards the whale.

Leave a hole for turning about 5cm (2") along the bottom.

Trim seams allowances down to 5mm (5/16") Clip curves before turning and stuffing.

Sew the opening closed and add eyes (fabric paint, buttons, embroidery or felt)
